PROFESSIONAL SUMMARY

Senior Software Engineer and Team Lead with 4.5+ years of experience designing and developing scalable enterprise applications using PHP (Laravel, CodeIgniter), Node.js (NestJS, Express.js), Next.js, PostgreSQL, MySQL and REST APIs. Skilled in backend architecture, API development, authentication, database design, cloud deployments, Agile delivery and leading cross-functional engineering teams. Proven track record of building secure, scalable and high-performance backend systems for enterprise applications.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, HTML5, CSS3

Backend: Node.js, NestJS, Express.js, Laravel, CodeIgniter, REST API Development

Frontend: Next.js, React.js, Bootstrap, Tailwind CSS, AJAX, jQuery

Testing: PHPUnit, Postman, Swagger (OpenAPI), API Testing, Debugging

Databases and ORM: PostgreSQL, MySQL, MongoDB, Prisma ORM, Sequelize ORM, Eloquent ORM

Authentication and Security: JWT, Google OAuth, RBAC

Architecture: MVC, OOP, Design Patterns, SOLID Principles

DevOps and Tools: Git, GitHub Actions, CI/CD Pipelines, AWS EC2, Linux, Apache, Firebase, JIRA, GitHub Copilot, ChatGPT, Gemini

PROFESSIONAL EXPERIENCE

Novami Infotech Pvt. Ltd.

Nashik, India

Team Leader

Aug 2025 – Present

- Led cross-functional development teams in delivering scalable enterprise applications using Node.js (NestJS, Express.js), Next.js and Laravel while defining technical architecture, coding standards and Agile delivery practices.
- Designed scalable backend architecture using NestJS, Prisma ORM and PostgreSQL while establishing development standards for secure, modular and maintainable software solutions.
- Provided technical leadership through code reviews, developer mentoring, task planning and engineering best practices to improve code quality and team productivity.
- Collaborated with international clients on requirement analysis, solution design, effort estimation and sprint planning to ensure successful project delivery.
- Oversaw secure API architecture, authentication, database design and third-party integrations including Firebase, Google OAuth and enterprise services.
- Implemented GitHub Actions CI/CD pipelines that automated deployments, reducing release time from nearly 30 minutes to under 10 minutes and improving deployment consistency.

Senior Backend Developer

Apr 2025 – Jul 2025

- Owned backend development of scalable enterprise applications using Laravel, CodeIgniter and Node.js (Express.js), following MVC architecture, Object-Oriented Programming (OOP) principles and Agile development practices.
- Designed and implemented secure RESTful APIs and integrated third-party services to support enterprise business workflows.
- Developed responsive dashboards and interactive user interfaces using HTML5, CSS3, JavaScript, Bootstrap, AJAX, jQuery and Chart.js.
- Implemented secure authentication and authorization using Role-Based Access Control (RBAC) and OTP-based authentication.
- Optimized MySQL queries, indexing strategies and backend logic to improve application performance and efficiency.
- Managed application deployment, server configuration, SSL setup and release management while leveraging CI/CD pipelines to streamline production deployments and minimize manual release effort.
- Collaborated with business stakeholders, QA engineers and cross-functional teams to deliver high-quality software throughout the SDLC using Agile methodologies.

ESDS Software Solution Ltd.*PHP Developer***Nashik, India***Nov 2021 – Mar 2025*

- Developed and maintained scalable backend applications using PHP, CodeIgniter, MVC Architecture and Object-Oriented Programming (OOP) principles.
- Built secure RESTful APIs and integrated third-party services to support enterprise application workflows.
- Optimized MySQL and PostgreSQL queries, indexing strategies and database schemas to support high-concurrency production environments serving lakhs of active users.
- Implemented scalable backend modules and automated business workflows to improve application reliability and performance.
- Configured Linux Cron Jobs and SMTP Email Services to automate scheduled processes and notifications.
- Collaborated with frontend developers to build responsive user interfaces using HTML5, CSS3, JavaScript, Bootstrap, jQuery and AJAX.
- Participated in the Software Development Life Cycle (SDLC), utilizing JIRA for sprint planning, defect tracking and Agile collaboration.

TECHNICAL HIGHLIGHTS

- Delivered scalable enterprise solutions across ERP, CRM, Healthcare, BFSI, DMS and Workflow Management domains, supporting high-concurrency, business-critical applications.
- Designed and implemented secure REST APIs, authentication systems (JWT, RBAC, OAuth), third-party integrations and scalable backend solutions using PHP and Node.js technologies.
- Led Agile software delivery by collaborating with international clients, mentoring development teams and translating business requirements into scalable technical solutions.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Engineering*Savitribai Phule Pune University***Nashik, Maharashtra***2017 – 2021*
