

Pooja Mane

Senior Full Stack Developer - Team
Leader

manepooja0000@gmail.com
9527676118
Nashik

Skills

Frontend

HTML, CSS, JS, Bootstrap, React
(Foundational), Tailwind CSS

Backend

Node.js (Express), PHP, Laravel,
CodeIgniter 3&4, Python (automation),
AJAX, REST APIs, API Design &
Integration (Node.js + Laravel)

Databases

MySQL, PostgreSQL, MongoDB

Soft Skills

Leadership, Communication,
Problem-Solving, Adaptability,
International Client Management

Tools & Platforms

Postman, AWS (EC2), GitHub Actions
(CI/CD), JIRA, GoDaddy, FTP, cPanel,
Google Firebase, Git, Copilot, GitLab,
Apache

Generative AI Tools

ChatGPT, GitHub Copilot, Gemini, Stitch

Education

Sandip Foundation

2017 - 2021

BE Computer

KTHM College

2015 - 2017

HSC (Science)

Professional Summary

Senior Fullstack Developer & Team Leader with 4.5+ years of experience delivering scalable BFSI, ERP, CRM, and DMS solutions. Expertise in PHP (Laravel, CodeIgniter) and Node.js (Express), with hands-on experience in RESTful API design, MySQL/MongoDB integration, and MVT-architecture. Proven track record in international client management, AWS (EC2) deployments, CI/CD automation and domain hosting using GoDaddy. Skilled in KYC workflows, automated invoicing, and payment gateway integrations (Razorpay, BillDesk). Strong in Agile development, backend scalability, and direct client-facing solution delivery. Actively leverages Generative AI tools to accelerate development, improve code quality, and enhance productivity.

Work Experience

Novami Infotech Pvt Ltd

Nashik

Team Leader

Aug 2025 - Present

- Led crossfunctional teams across PHP (CodeIgniter CI3/CI4, Laravel) and Node.js improving sprint efficiency by 20% through structured Agile planning.
- Developed RESTful APIs using Node.js (Express, MVT) and Laravel, integrating with MySQL for ERP/MLM applications. Built modules for authentication, customer/vendor management, file uploads, category/subcategory retrieval, subscription packages and mobile application integrations.
- Implemented CI/CD workflows with GitHub Actions and provisioned AWS EC2 instances for secure, scalable deployments..
- Collaborated directly with international clients for requirement gathering, sprint reviews, and production delivery in BFSI/ERP projects.
- Leveraged AI agents and coding assistants (Copilot, Gemini, Stitch) to accelerate feature development, improve code quality, and automate repetitive engineering workflows.
- Built a Windows monitoring agent in Python to strengthen system audits and operational visibility.
- Managed endtoend deployments (hosting, domain setup, SSL, performance monitoring) ensuring consistent delivery of Laravel/CodeIgniter modules in live production environments.
